- Bournemouth University International College(2023-2024)
- Bournemouth University (2nd year)

BOURNEMOUTH UNIVERSITY

- BA (Hons) Computer Animation & Visual Effects

LANGUAGES

- English
- Russian

SUMMARY

I am a Junior 3D Artist specialising in character modelling and sculpting, with a strong interest in creating expressive and stylised characters for games and animation.

I have a solid foundation in art developed over 11 years of study, which informs my approach to form, anatomy and visual storytelling.

SKILLS

3D sculpting and modelling

I have strong skills in 3D sculpting and modelling, with a focus on character creation. I am confident in working with anatomy, form and proportions, and I aim to produce clean topology and detailed, high-quality models suitable for further production stages.

3D Animation

Link to my Animation Reel:
https://youtu.be/bj1vAGVm6H4?si=SHljo4J5472E14K6

I create animations applying core principles such as timing, spacing, and anticipation to ensure natural and expressive motion.

Concept Art/Story Board/Storytelling

I have experience in concept development and visual storytelling, allowing me to plan and communicate ideas before production. I can create basic concept art and storyboards that support character design and narrative structure.
